

Evers & Sons to Showcase Quality and 100% Traceability at AWS' Pipeline, Facilities & Tanks Conference

October 2, 2025 at 11:59 AM EDT

HOUSTON—(BUSINESS WIRE)— Evers & Sons Inc. is proud to announce its participation as an exhibitor at the upcoming Pipeline, Facilities & Tanks Conference hosted by the American Welding Society (AWS), taking place November 5–6, 2025, at Stockyards Station in Fort Worth, Texas. This event brings together industry leaders to address the latest developments in welding, [fabrication](#), and [pipeline integrity](#).

Founded in 1919, the American Welding Society is the premier nonprofit organization dedicated to advancing the science, technology, and application of welding and allied processes. AWS sets globally recognized standards for welding and inspection, provides certification programs for professionals, and fosters technical education through training and publications. With more than 60,000 members worldwide, AWS serves as the central voice of the welding community, shaping the future of industries that rely on fabrication and welding excellence.

As a proud member of AWS, Evers & Sons Inc. actively supports the society's mission and standards; membership allows the company to stay aligned with the latest codes, practices, and innovations that guide the industry. Additionally, it provides opportunities for QA/QC representatives to maintain certifications, participate in technical committees, and network with other professionals across the energy, industrial, and infrastructure sectors.

The Pipeline, Facilities & Tanks Conference will provide a platform to showcase how quality and accountability define every aspect of Evers & Sons' operations. This philosophy is reinforced by the company's comprehensive, 100% weld traceability program, which ensures that each weld completed in its fabrication operations can be traced back to its welder, procedure, inspection, and material source. This level of documentation and diligence provides the client with confidence that all work is performed to the highest standards of safety, compliance, and durability. In turn, this reduces the client's risk, improves performance, and protects their investments.
