

Brownfield Compressor Station

— Louisiana

Project Overview

Evers & Sons Inc. provided full field installation services for a 100 MMSCFD brownfield compressor station in Louisiana. The project included concrete, structural steel, mechanical piping, and facility painting to support the installation of prefabricated compressor packages and associated fuel gas and filtration systems. Work was executed within an active facility environment while integrating new compression infrastructure to enhance system capacity and reliability.

Key Equipment:

- (2) 3606 compressor skid packages (prefabricated)
- (2) Discharge coalescing filters
- Fuel gas skid

Scope of Work:

- Concrete
- Structural steel
- Mechanical piping
- Facility painting

Field Installation Statistics:

- ±70 cubic yards concrete
- ±8 tons structural steel
- ±3,500 linear ft. pipe – from 1" to 30"
- 699 welds
- ±11,000 field weld inches
- 243 flange torques

Company Overview

Evers & Sons Inc. is a third-generation, family-owned energy services company providing services across Engineering, Facilities, Fabrication, Pipeline, Maintenance, and Decommissioning & Asset Abandonment. Together, we connect engineering expertise with proven field execution to help our customers plan smarter, build efficiently, and operate with confidence.
