

Greenfield Compressor Station

— Oklahoma

Project Overview

Evers & Sons Inc. provided full field installation services for a 290 MMSCFD greenfield compressor station supporting natural gas transportation infrastructure. The scope included concrete and grout, structural steel, mechanical piping and equipment installation, instrumentation, facility painting, and NDT and pressure testing to support high-horsepower reciprocating compression units and associated utility systems. The facility enhances system capacity, reliability, and operational performance.

Key Equipment:

- (2) CAT G3608 A4/ Ariel KBC/4 reciprocating gas compressor skid packages (prefabricated)
- Includes exhaust mufflers & intake air housing approx. 5,500 hp
- (1) Gas cooler
- (2) Unit blowdown silencers
- (2) Station blowdown silencers
- (2) Utility coolers
- (2) Discharge coalescing filters
- (1) Fuel gas skid
- (1) Air compressor skid
- (1) 500 Kw natural gas generator
- 210 BBL atmospheric tank
- 12" ANSI 600 ultrasonic meter
- (1) 1,500-gallon sump tank
- Produced water tank
- Set 40' conex building

Scope of Work:

- Concrete/grout
- Structural steel
- Mechanical piping
- Mechanical equipment installation
- Instrumentation
- Facility painting
- NDT and pressure testing

Field Installation Statistics:

- ±700 cubic yards concrete
- ±18 tons structural steel
- ±7,500 linear ft. pipe – from 1" to 16"
- ± 1825 welds
- ±23,000 field weld inches
- ± 490 threaded connections
- ± 315 flange torques
- ± 2,200 CY of excavation and backfill

Company Overview

Evers & Sons Inc. is a third-generation, family-owned energy services company providing services across Engineering, Facilities, Fabrication, Pipeline, Maintenance, and Decommissioning & Asset Abandonment. Together, we connect engineering expertise with proven field execution to help our customers plan smarter, build efficiently, and operate with confidence.
