

12" Pipeline Capacity Expansion

— Texas

Project Overview

Evers & Sons installed 21,467 linear feet of 12-inch steel pipeline to expand capacity between two existing stations. The scope included installation of prefabricated 12-inch launcher and receiver assemblies and fabrication and installation of station tie-in piping to integrate the new discharge line into the existing system.

Length & Configuration:

Installation of 21,467 linear feet of 12" steel pipeline

Components Installed:

- Installation of one each 12" prefabricated launcher and receiver
- Fabrication and installation of station tie-in piping

Functionality:

The installation expanded discharge capacity between two existing stations to support increased system throughput.

Company Overview

Evers & Sons Inc. is a third-generation, family-owned midstream energy construction company providing services across Facilities, Fabrication, Pipeline, Maintenance, and Decommissioning & Asset Abandonment. Together, our integrated divisions provide solutions that build, support, and sustain the energy infrastructure across the United States.
