

Pipe Fabrication

Project Overview

Evers & Sons Inc. provided pipe fabrication services, including procurement, carbon and stainless-steel fabrication, NDE, hydro testing, and PWHT. Our team delivered complete QA/QC documentation packages with every job, including weld maps, test reports, and material traceability records. Fabricated components included interconnecting pipe spools, launchers, receivers, main line valve assemblies, firetubes, and bridles. We worked closely with client engineering and operations teams to incorporate real-time revisions throughout the fabrication process.

Scope of Work for Pipe Spool Package:

- Procurement
- Carbon and stainless-steel fabrication
- NDE services
- Hydrotesting
- PWHT
- QA/QC inspections
- Turnkey Job Books: WPS, Welder Certs, MTR's, Weld Log Tracker, Heat Map, Weld Map, Hydro Test Packs, Coating Reports, etc.
- Logistics

Components Fabricated:

- 1,067 interconnect pipe spools

Additional Scope:

- Collaborated with client management, engineers, and operations during fabrication to incorporate desired revisions.

Company Overview

Evers & Sons Inc. is a third-generation, family-owned energy services company providing design and construction support across Engineering, Facilities, Fabrication, Pipeline, Maintenance, and Decommissioning & Asset Abandonment. Together, we connect engineering expertise with proven field execution to help our customers plan smarter, build efficiently, and operate with confidence.
