

Vessel Fabrication: 60"

Project Overview

Evers & Sons Inc. provided ASME Section VIII Division I vessel fabrication services, including National Board-certified repairs and alterations. This project scope covered procurement, carbon and stainless-steel fabrication, NDE, PWHT, hydro testing, and final inspection by an authorized agency (Bureau Veritas). We are certified to apply the U, S, R, and NB stamps, ensuring full code compliance. Fabricated vessels included blowdown vessels, air receivers, reflux accumulators, discharge vessels, surge vessels, and compressor bottles. All projects were delivered with complete turnkey job books, coatings, and logistics support.

Scope of Work:

- Procurement
