

6" Pipeline System Reconfiguration

— Texas

Project Overview

Evers & Sons removed an existing 6-inch launcher, underground jumper line, check valve, and associated bypass piping and installed new fabricated piping to reconfigure the system. The new installation was tested and integrated to support a new well connection into existing infrastructure.

Functionality:

The work enabled a new well connection to existing infrastructure by reconfiguring the system to safely introduce production into the pipeline network.

Company Overview

Evers & Sons Inc. is a third-generation, family-owned midstream energy construction company providing services across Facilities, Fabrication, Pipeline, Maintenance, and Decommissioning & Asset Abandonment. Together, our integrated divisions provide solutions that build, support, and sustain the energy infrastructure across the United States.
